Venue 1: Melamchi Water Supply Project (MWSP) and Melamchi Bazaar – Hit by heavy flash flood in 15th June 2021

The Melamchi Water Supply Project (MWSP) is one of the most viable long-term alternatives to ease the chronic water shortage situation within the Kathmandu Valley. The project is designed to divert about 170MLD of fresh water to Kathmandu Valley from the Melamchi

River in Sindupalchowk district. But on 15th June 2021, the Melamchi Water Supply Project and Melamchi Bazaar faced a severe geodisaster when heavy rainfall triggered floods and landslides. The swelling Melamchi River caused extensive damage to critical infrastructure, including the tunnel intake and headworks. This disaster highlighted the vulnerability of infrastructure in geologically active and flood-prone regions. Ongoing recovery efforts emphasize building resilient systems to mitigate future geohazards. The site offers valuable insights into disaster preparedness and infrastructure management in challenging geotechnical conditions.

Venue 2: Bhaktapur Durbar Square – Historical Palace Complex

After returning from Venue 1 we will visit Venue 2 i.e. Bhaktapur Durbar Square. Bhaktapur Durbar Square is a UNESCO World Heritage site and home to the magnificent royal palace complex of the Malla kings. Built between the 12th and 18th centuries, this architectural masterpiece reflects the grandeur of Nepalese craftsmanship, with intricately carved wooden windows, temples, and courtyards. Key highlights include the 55-Window Palace, the Golden Gate, and the Vatsala Temple. Despite suffering damage during the 2015 earthquake, the palace complex symbolizes Nepal's rich cultural and architectural heritage. A visit offers a journey back to the era of Nepal's medieval kingdoms.

The details of the post excursion tour with action plan will be informed later.
